

## Technical Specifications

### Available Sizes

MDF is available in six standard sizes (2400 x 900mm, 2400 x 1200mm, 2400 x 1800mm, 2700 x 1200mm, 3600 x 1200mm and 3600 x 1800mm). Thickness range from 3mm - 32mm.

### Moisture Resistant

If purchasing Moisture Resistant MDF, it can be reliably used in moisture prone areas such as kitchens, laundries and bathrooms.

### Immense Strength

MDF is a resilient and stable product that holds its form; expanding and contracting less than natural wood under a diverse range of conditions.

### Custom Veneers

To achieve your desired aesthetic, MDF can be made to order with a custom face in any of our 14 stocked veneer sheets.

## Medium Density Fibreboard

### THE MANUFACTURING MASTERPIECE

**Medium Density Fibreboard** (MDF) stands as a remarkable feat in wood engineering, boasting a sleek surface and a core with consistent density. Through an intricate manufacturing process, MDF achieves a density surpassing that of Plywood and a strength superior to Particle Board. Its versatility is another jewel in its crown, as MDF can be easily painted, cut, machined, and drilled with precision, all without the drawbacks of splintering or chipping. As a result, it has become a top choice for cabinet making and shop fitting applications.

The production of MDF involves breaking down hardwood or softwood into fine wood fibers. These fibers are then combined with a mixture of wax and a resin binder. Under high temperatures and intense pressure, this concoction transforms into the well-known final product - Medium Density Fibreboard (MDF).

# MDF Product Range

## THE TERRIFIC THREE

### Standard MDF

An MDF range available in both standard and high moisture resistance.

### Melamine MDF

A white Melamine faced range available in both standard and high moisture resistance.

### Veneered MDF

A diverse range of decorative veneers pressed onto an MDF substrate. More available in store.

American Cherry

American Walnut

American Oak

Blackbutt

NFG Blackbutt

European Beech

Jarrah

Radiata

Rock Maple

Sapele

Spotted Gum

Tasmanian Oak

Tasmanian Myrtle

Tasmanian Blackwood

## Product Benefits

### Customisable

The robust nature of MDF and absence of knots or rings means it can be easily painted, cut, machined and drilled without splintering or chipping.

### Accessible Pricing

With an entry price lower than most natural wood products, MDF is an excellent option for customers seeking a robust product at an affordable price.

### Exceptional Services

We are your reliable partner throughout the entire wholesale process. Count on us for a seamless and satisfying experience.

### Timely Delivery

Our efficient logistics and streamlined supply chain ensure that your MDF board orders reach your specified location on time, every time.

You can now order a free MDF sample via [our website \(chinagoodwood.com/contact-us\)](http://chinagoodwood.com/contact-us).
